**EDUCATION HISTORY:**

Education level:	Name of school/university:	Duration:	Year of graduation:

**RELEVANT WORK EXPERIENCE:**

Post held:	Name and address of employer:	Relevance:	Period of employment:

OTHER INFORMATION (if more space is needed, please attach the information as a letter):

**THE APPLICATION DEADLINE IS FEBRUARY 1**

**THE FOLLOWING DOCUMENTS MUST BE ATTACHED TO THE APPLICATION:**

- Certified photocopies of transcripts of records
- Photocopy of Passport
- Documentation on how the studies will be financed

For students who are in the process of finishing a Bachelor degree and who will not graduate before the application deadline, please attach a letter (in English), explaining which courses have yet to be finished and when the results will be available. A transcript of the results already available is also required. We call attention to the fact that no papers will be returned to the applicant.

**ADMISSION REQUIREMENTS:**

If there are more students than the course provides for, an average will be taken of all the grades on their previous transcripts of records. An additional 4 points for each completed graduate programme will be given and 1 point (up to a maximum of 4) will be given for each documented year of full time employment within relevant areas.

To qualify for admission to the Master of Technology in Media Technology the applicants must have a Bachelor's degree in Computer Engineering or Graphic Arts Engineering. To qualify for admission to the Master of Science in Media Technology, applicants must have a 3-year undergraduate degree, preferably a Bachelor's degree in computer science or a Bachelor's degree in graphic arts engineering or media technology. The applicants must document that they have at least 60 ECTS credits in information technology/computing subjects (of which at least 10 ECTS credits in databases, data modelling, and/or information modelling) and at least 10 ECTS credits in mathematics.

To qualify for admission to the Master of Science in Information Security, applicants must have a 3-year undergraduate degree (Bachelor). The applicants must document that they have at least 10 ECTS credits in mathematics and at least 60 ECTS credits in information technology / computing subjects. In addition, the students should have the ability to master mathematical analysis, discrete mathematics, programming, algorithms, computer architecture, operating systems, data communications, databases and program development.
