

## **RXT is looking for a Navigation Support Engineer**

We are looking for candidates with minimum Bachelors Degree in Land Survey, GIS, Geomatics, or similar. Candidates with experience from the seismic industry, especially OBC will be preferred, but other offshore survey background is also interesting. Newly qualified candidates will also be considered.

The position will be based in our Head Office at Lysaker. Some travel and a limited amount of offshore work should be expected.

The main tasks are to support the offshore navigation department, survey planning, quality control, various cartographic work, logistics, and other support functions.

You will work as a part of a team, and the tasks will require a wide range of skills: From practical work, through troubleshooting to administrative and analytical skills.

### **RXT offers:**

- Challenging environment and cutting edge technology
- Promotion based on performance
- Commitment to excellence and technology
- Dedication to safety, environment and quality of product
- Leadership in technology development
- Equal opportunity employment
- Workforce diversity
- Competitive salary/benefits

### **RXT are looking for:**

- Dynamic and self motivated individuals
- Willingness to learn
- Flexibility and desire to undertake the role and succeed
- Out of the box thinkers
- Confidence and ability to work unsupervised
- Taking charge of the assigned function or task
- Service and customer orientation
- Liaising with clients and striving to exceed client's expectations
- Troubleshoot, resolve and report appropriately
- Team players in delivering a coherent service
- Strong interpersonal, communication and organizational skills
- Ability to travel worldwide on short notice
